

# Deliver the next era of banking automation

Automate complex, high-stakes work with AI agents regulators can trust

## Your bank runs on thousands of critical processes every single day.

Your processes move money, onboard customers, detect fraud, and keep you compliant. Yet, most automation hits a ceiling of value, leaving complex cases requiring cycles of manual steps for overworked teams.

With agentic AI, you can redesign how you operate to keep manual work at a minimum. Camunda brings deterministic workflows and dynamic AI agents in the same process.

You can safely automate that high-stakes work in onboarding, financial crime, and payments in a way regulators and your board can trust.

**45%****Less development time****7x****Increased analyst capacity****90%****Faster customer onboarding**

## Turn your strategic vision into reality

### Reimagine every process

Connect people, systems, and AI agents across departments so cases move from first touch to resolution with minimal human effort.

### Deploy agentic AI with confidence

Design and deploy AI agents into regulated flows with guardrails, human-in-the-loop, and audit trails for every action and decision.

### Accelerate time to value

Launch new, AI-native capabilities in weeks to deliver meaningful business outcomes and prove value quickly.

# Goldman Sachs

*Deployed Camunda as **core orchestration platform**, processing **\$1+ trillion in payments** across 60+ countries daily and managing 6+ million weekly human tasks for critical banking processes.*

# The foundation for autonomous banking

One platform orchestrates everything—from deterministic processes to dynamic AI agents—with complete governance and control.

## Scale without limits.

Run millions of processes every day — from split-second payments to long-running investigations or case work.

## Open by design

Use any AI model, integrate any system, and code in any language while keeping control over how work flows across your bank.

## Build once, reuse everywhere

Speed delivery with reusable process and agent components that work across departments, products, business units, and regions.

## Adapts to your needs

Deploy on premises or any cloud. Version and evolve processes and agents safely without disrupting the business.

**Goldman Sachs**

 **NatWest**

 **BARCLAYS**

"In payments, we have to work 24×7.

We're talking about around **250 million payments per year** and up to 2 million payments per hour."

"AI brings efficiency in place.

Our Digital Fraud Agents *protect customers, saving 21 minutes per case* on average."

"With Camunda, we now have a lot **more visibility and control.**

Our run-the-bank teams can see exactly what's going on."

## Transform your bank with confidence

Whether you're modernizing existing banking processes or pioneering agentic AI in core domains like onboarding, financial crime, and payments, Camunda provides the enterprise agentic automation platform and expertise to deliver results at scale.
